House Number Sign

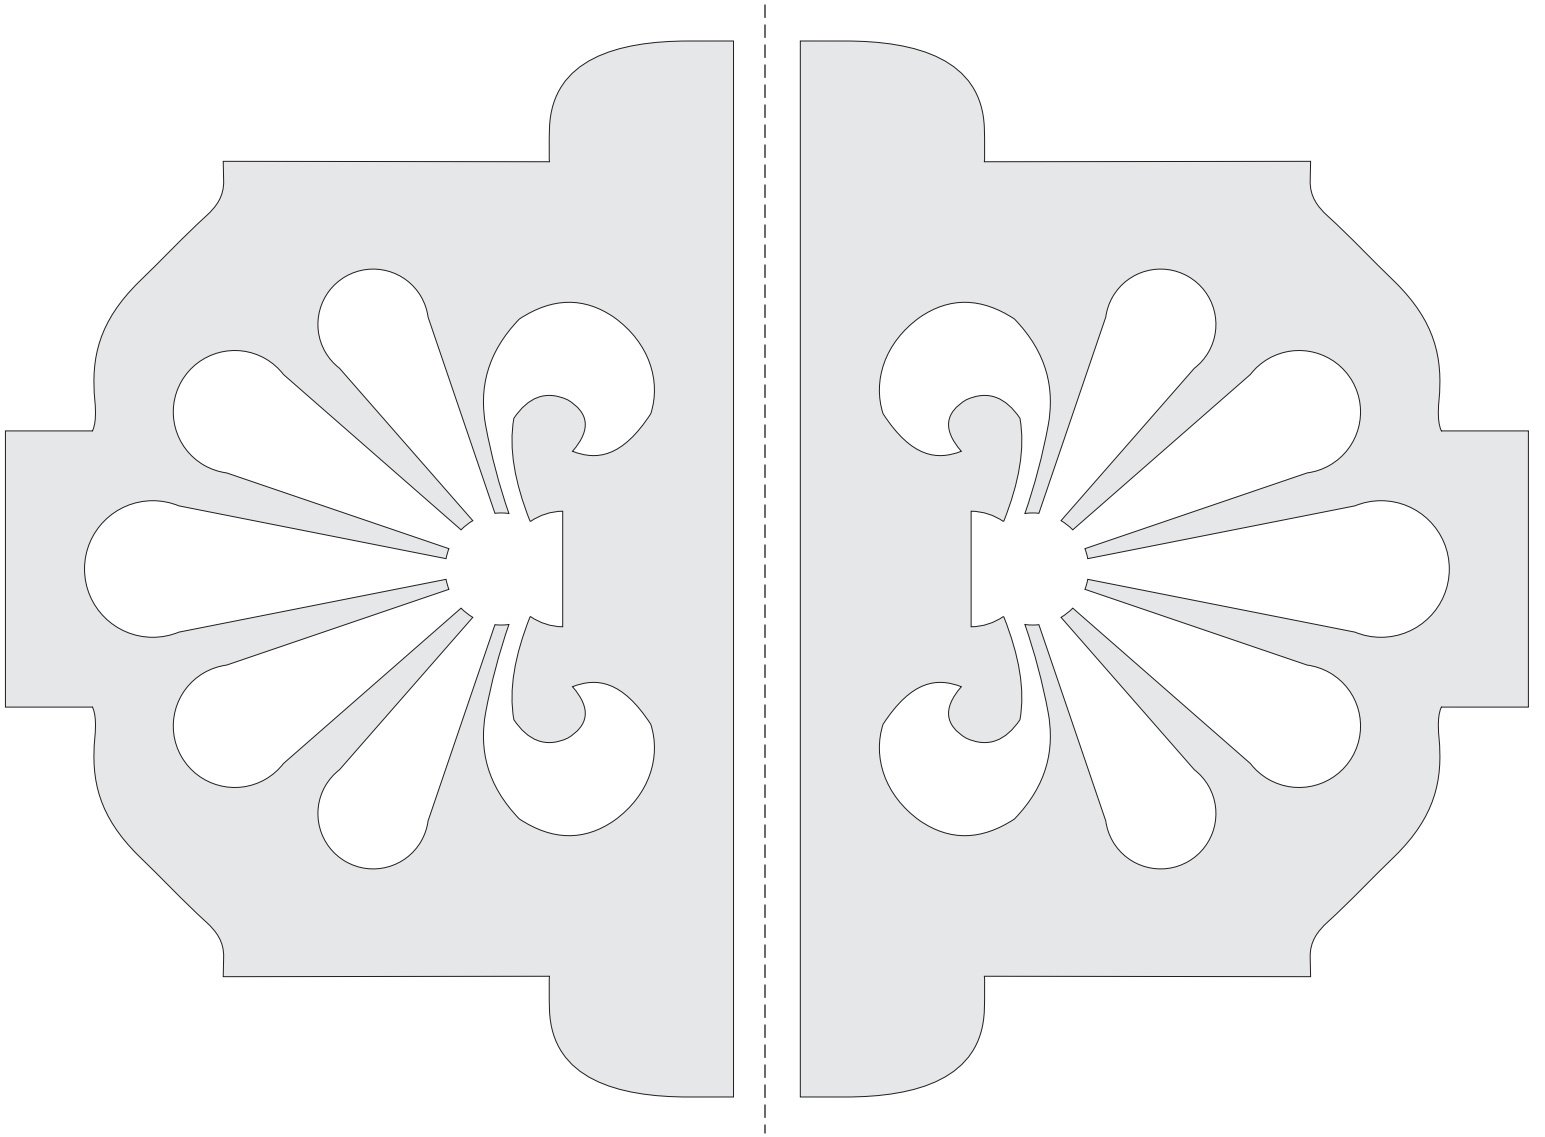

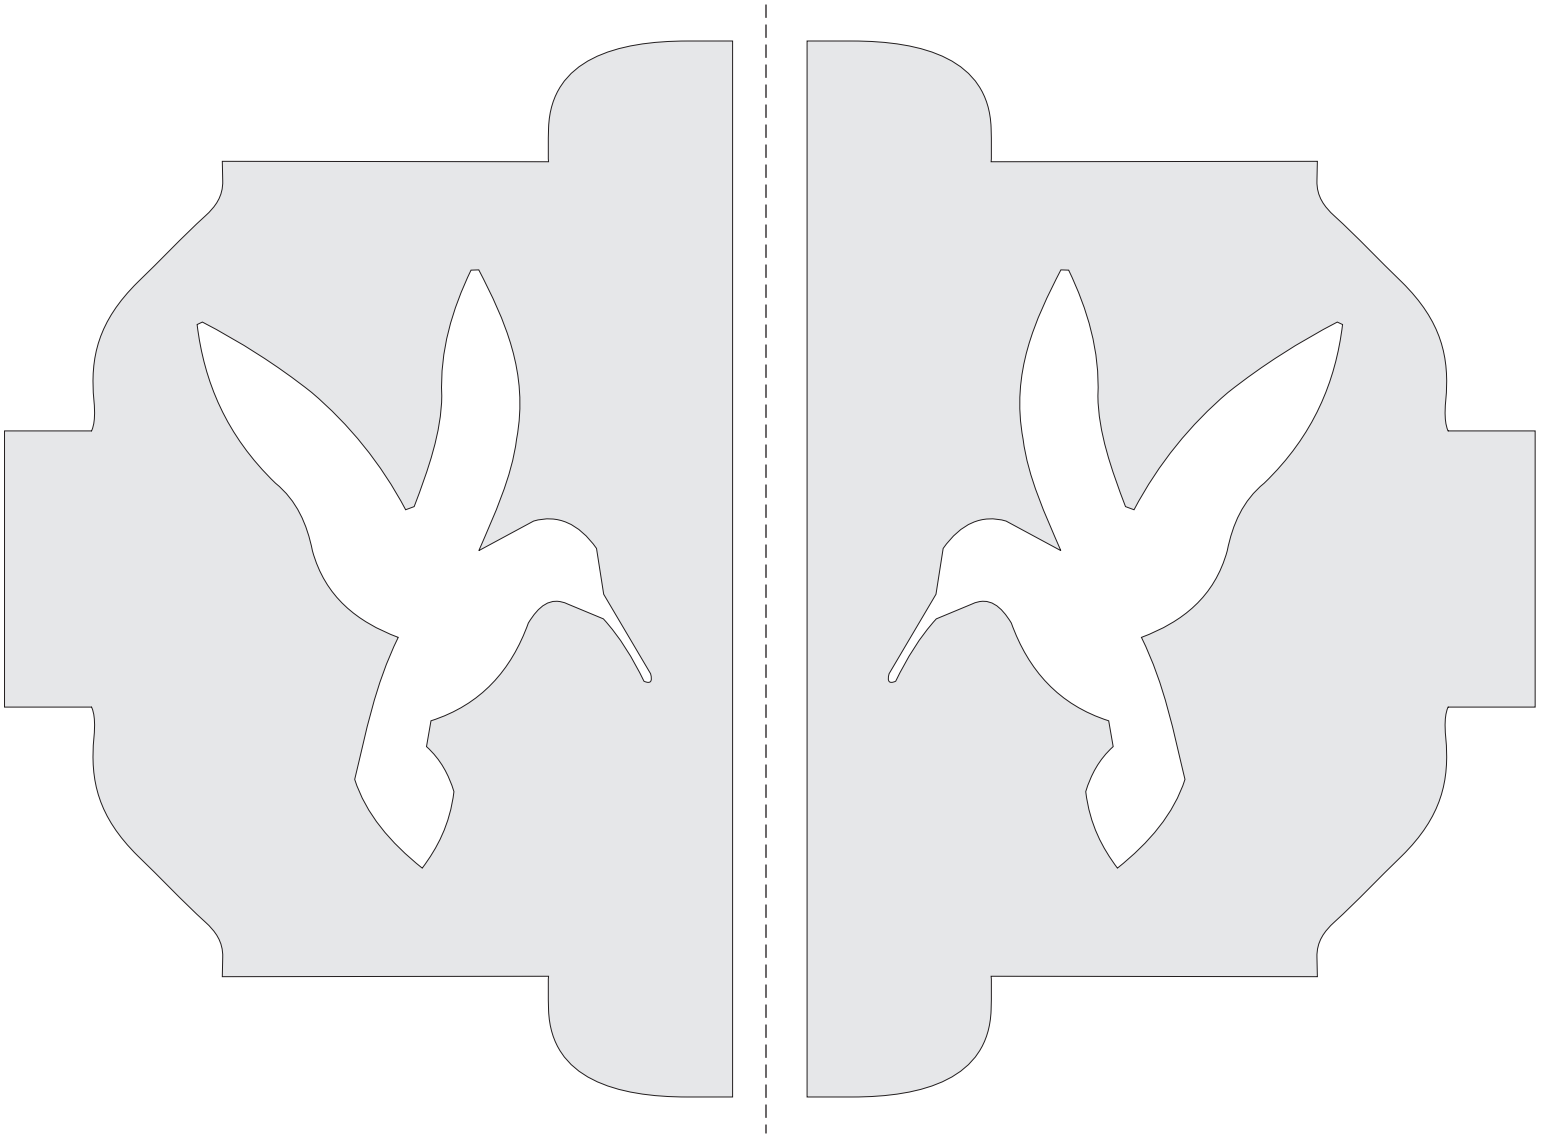

To make this sign I purchased $\frac{1}{2}$ x 6" x 4" poplar board from Home Depot. They sell these boards for about \$5 in the ready cut craft section. The actual width of the board is 5 $\frac{1}{2}$ " so the pattern Has been sized to fit.

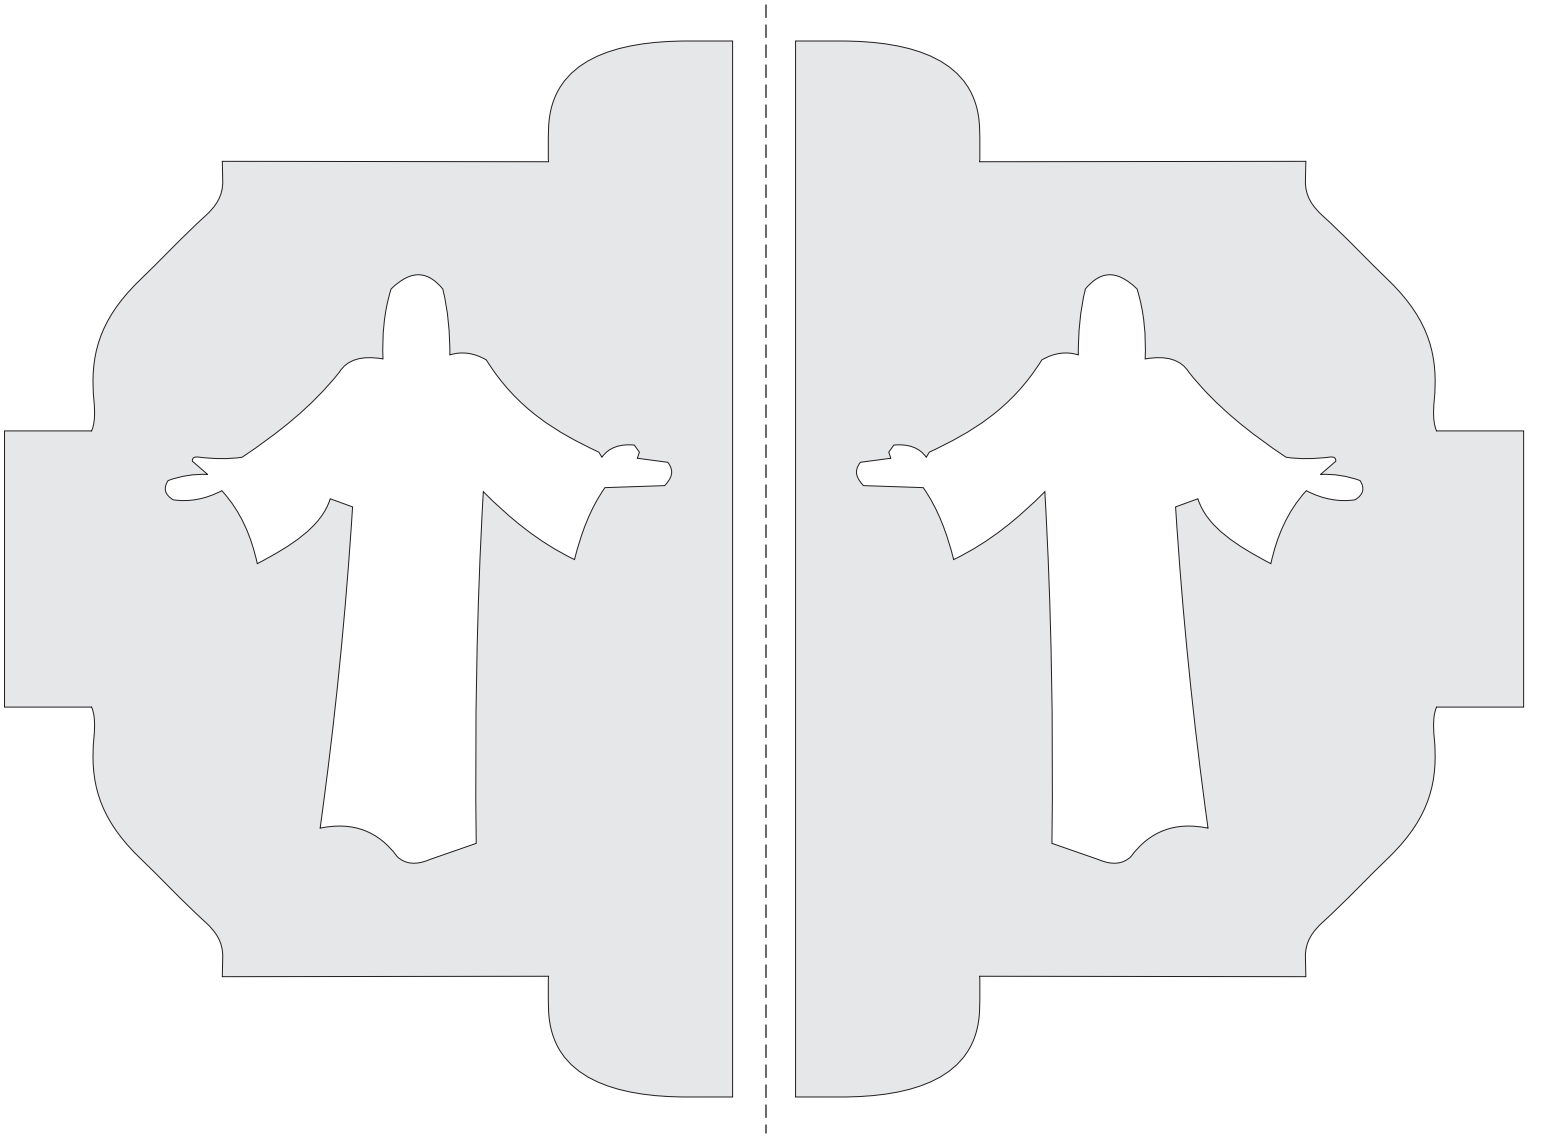

Cut the numbers from one of the 5 included fonts first. Now you can use the cut numbers to help size the sign board.

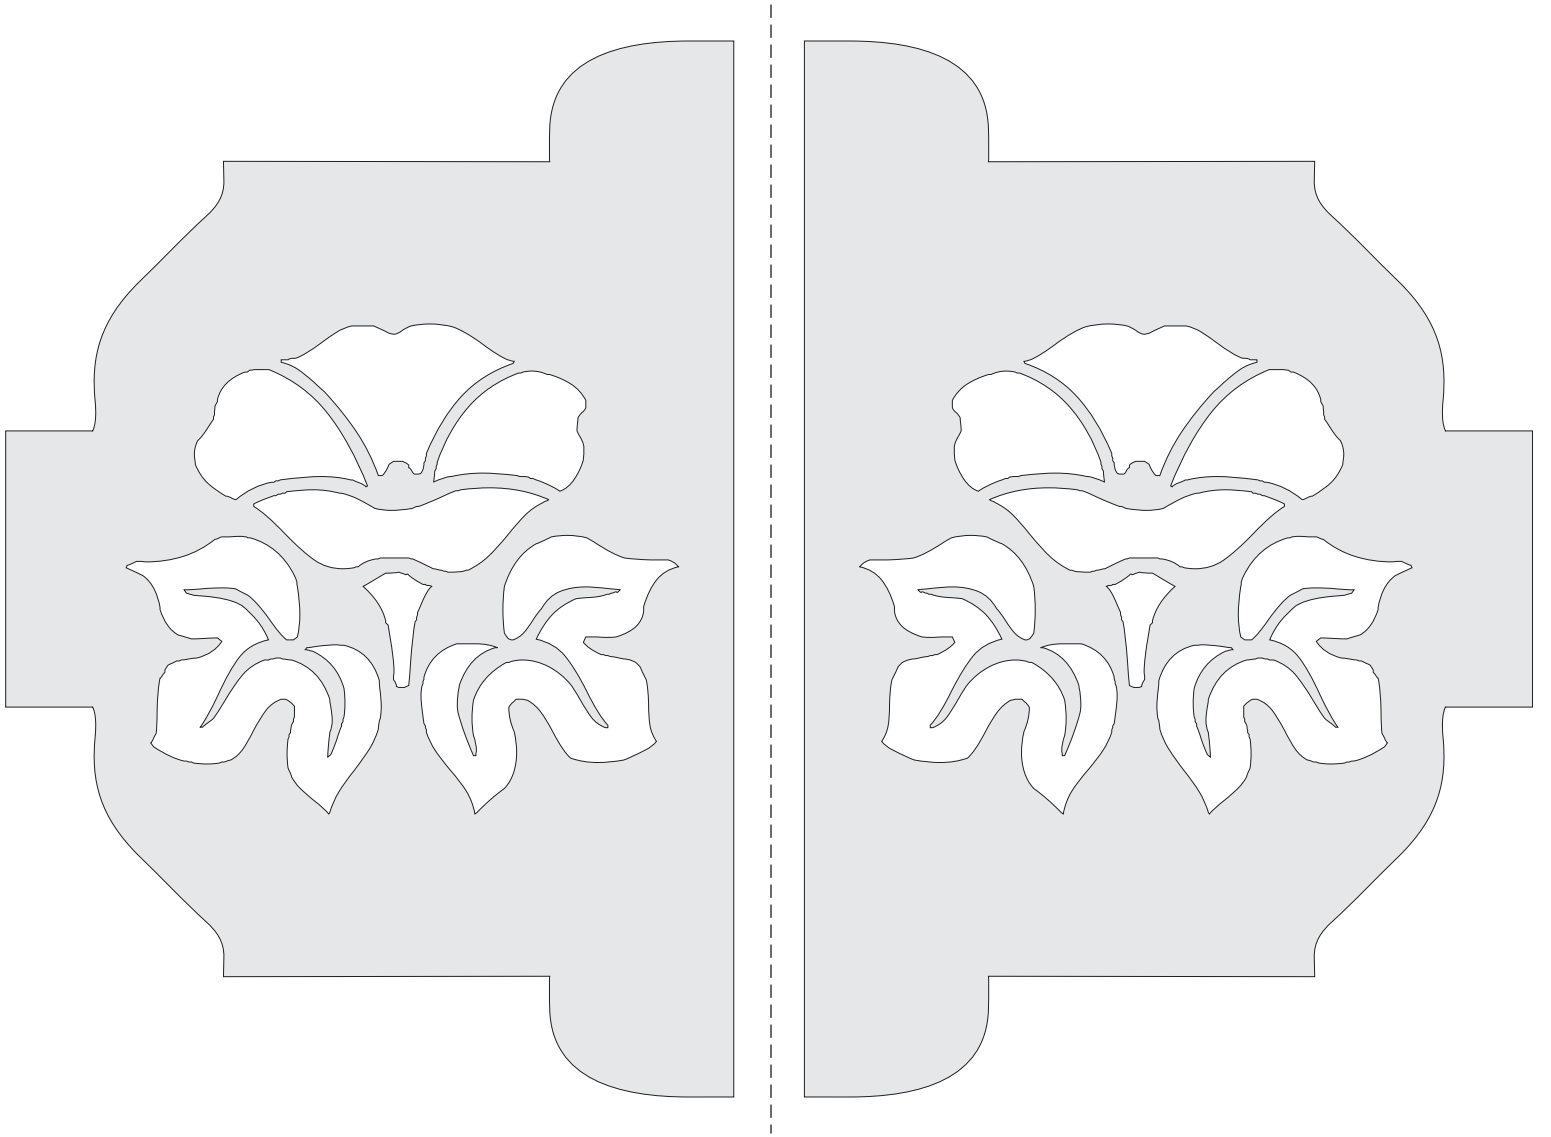

The sign can be finished with paint which helps to waterproof it. If you use hardwoods for the sign make sure you apply a good finish so the wood does not rot in the weather.

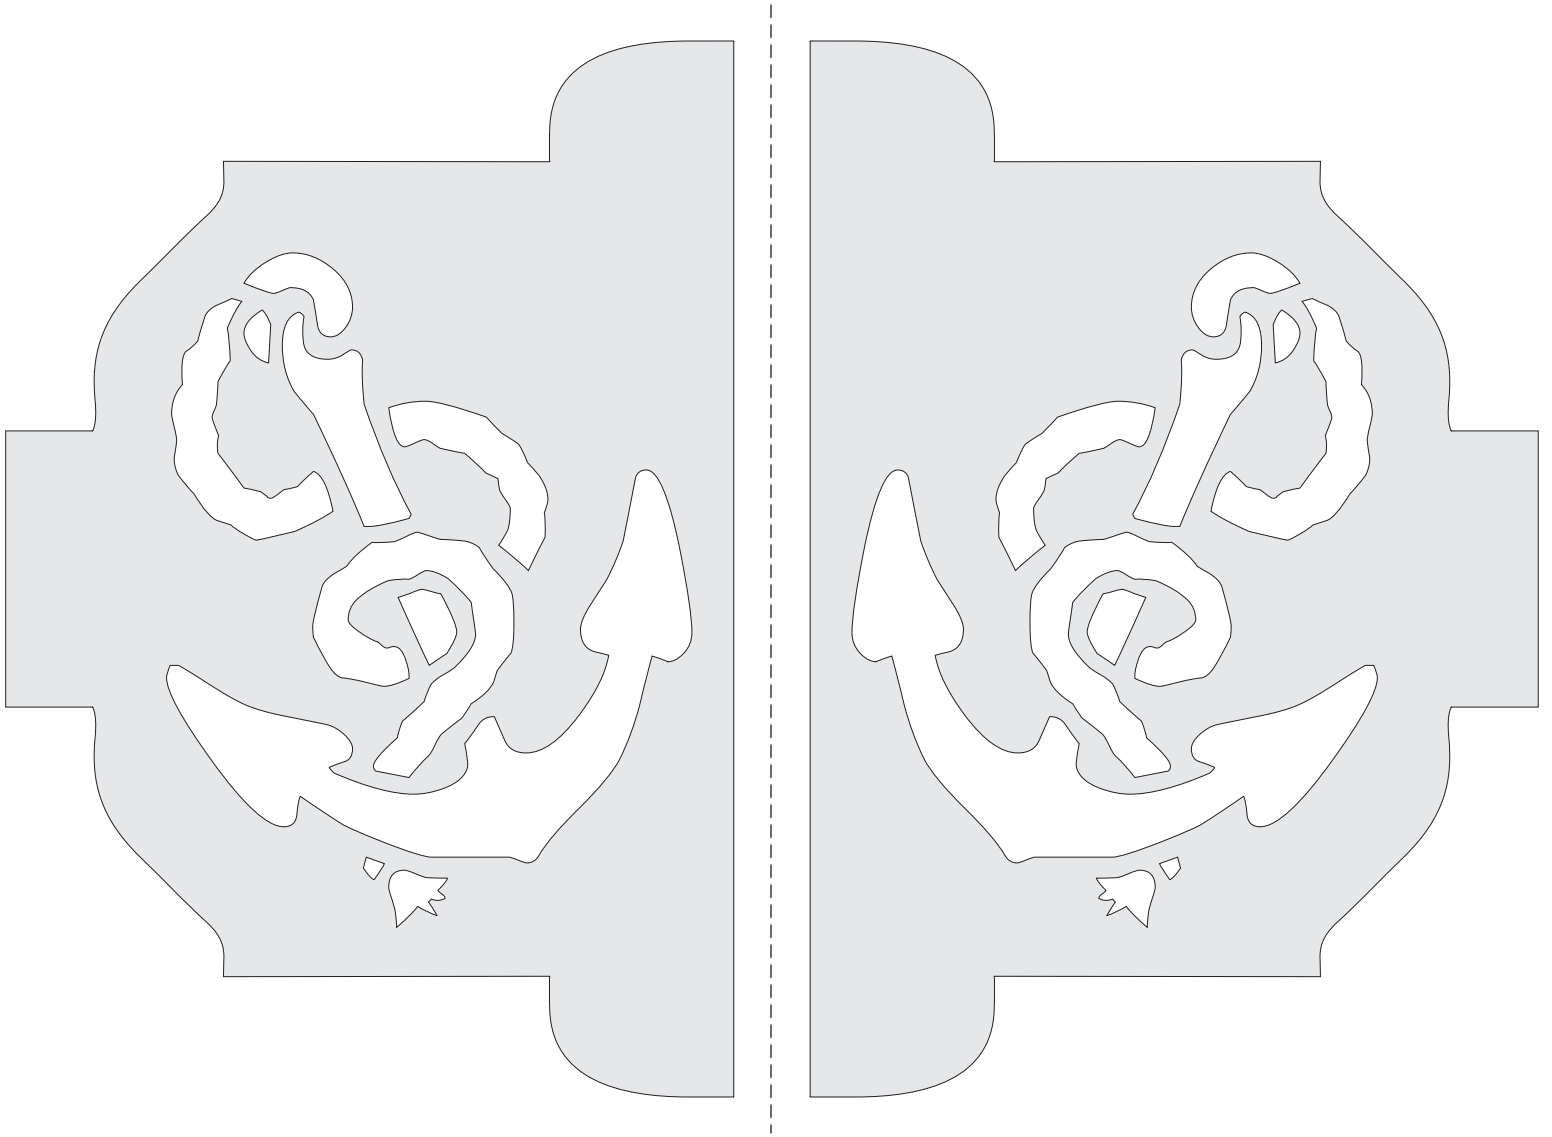

Adjust gap to size.
