

*In order to achieve the highest-quality images possible, Cognex® offers a wide variety of light modules. The LED array light module is designed for use in typical bar light applications, including front, angle, and multiple-angle lighting (for feature highlighting). The LED Array light module is available in red, UV, and IR models. Additionally, an optional diffuser enhances this light module's front lighting performance, and also allows it to be used as a backlight.*

## Models

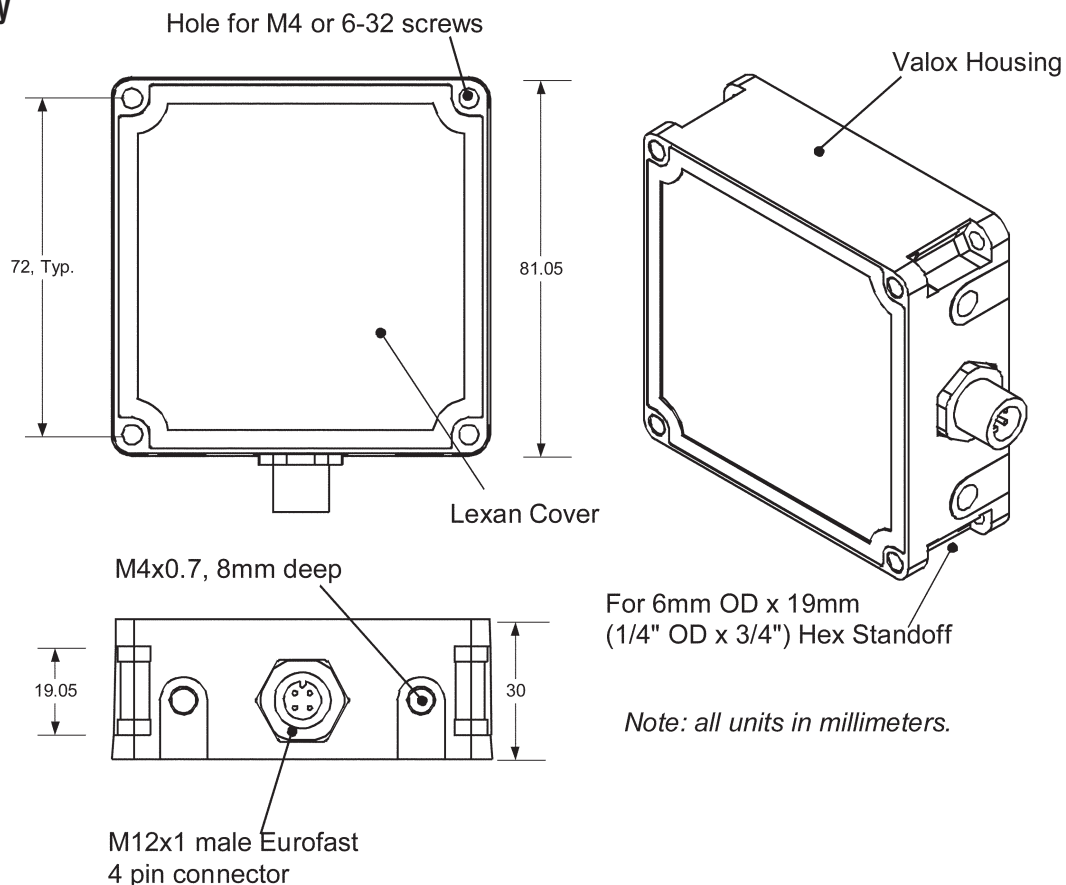

- White LED Array Module: Model IDWA
- IR LED Array Module: Model IDIA
- Red LED Array Module: Model IDRA
