

Introduction

PCC-30000 Colour Changing Controller is a simple miniature driver that allows single colour or multiple colour changing effects. It is capable of delivering millions of colours to about 60 watt of RGB lamps.

Features

1. Single colour Mode: 7 standard colours (red, green, blue, pink, amber, cyan and white) to chose from.
2. Colour Changing Mode: Standard colour changing sequence and ability to stop at any colour.

Applications

- Wall Washing
- Architectural Lighting
- Special Effect Lighting

Product Specification

No.	Parameter	Value
