

Cool-LED - High Power, Switchable LED DRIVERS

350/700mA and 500/1000mA

Cool-LED DRIVERS provide a high performance solution for powering the AlphaLED module from the mains supply.

Designed to power a single AlphaLED module to its optimum efficiency.

High efficiency design ensures cool operation and long life. The compact enclosure is available in Integral (B) and Remote Mount (C) versions. Remote types feature screwless cable clamps. **Cool-LED DRIVERS** are open and short-circuit protected and have self-resetting over temperature trip.

Cool-LED DRIVERS feature a switch, accessible during installation, to select between full and half rated output current.

Consult the sales office for versions where the current level can be set by external switch or presence detector. These drivers include a "soft dim" feature to avoid sudden steps in LED brightness.
