

LED Street Light Street[®] Series

IP-30W

The Future Light

Description

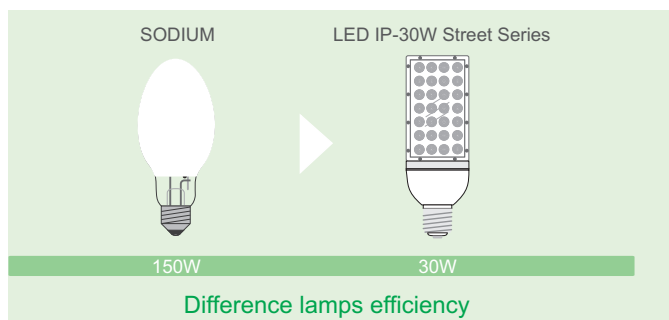

The model IP-30W is an ecological LED Street Light Series lamp made by SMD technology (Surface Mount Device). Using diffuse light system with 80 degrees reflector give a perfect and clear light, can easily replace and compare with a conventional 150 watts sodium street light. Their body are made of aluminum alloy and acrylic impact resistant, suport high temperature enviroment, UV free, no internal pressure (according to IEC 357), no inside gases and not require ballast. The IP-30W LED street light operate at different view angles, inovation mixing lighting design, constant current driver, instant start operation, full range voltage, easy installation, high performance, energy consumption saved up to 80% and long life (up to 50.000h).

Aplications

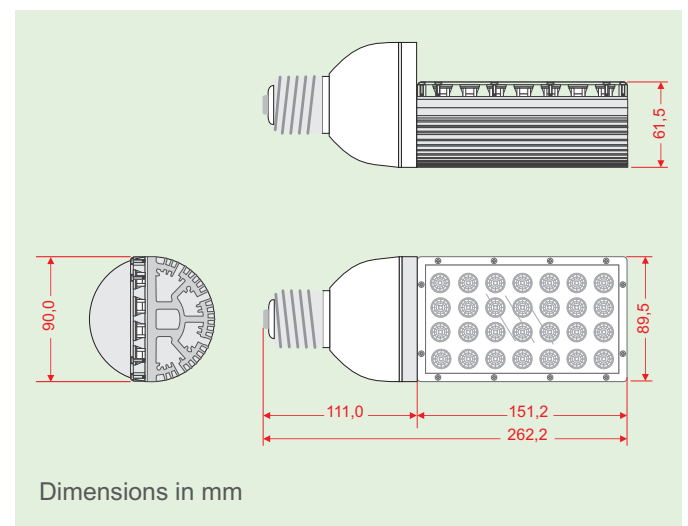

Ideal for use in public lighting places / access lighting and meets the demands of different places where there is need for powerful lighting.

Of continuous light (no flickering, no strobe) are ideal for lighting in places where there are mainly contact man / machine.
