HARMONIC DRIVE GEARING

CSF SERIES : QUICK CONNECT GEARHEADS

The CSF-GH series gearhead has been designed to easily mount to any motor, yet maintain all of the benefits of harmonic drive gearing including high accuracy and zero-backlash. The gearhead has a compact and lightweight construction.

This gearhead features high performance harmonic drive gearing which uses HD Systems' patented technologies and manufacturing expertise.

- **ZERO BACKLASH** The unique operating principles of harmonic drive gearing enable the gear teeth to be continually preloaded which provides zero backlash in the tooth mesh.
- **HIGH MOMENT CAPACITY** A high stiffness cross roller bearing is used as the output bearing. This bearing can support high radial, axial, and moment loads.
- **Easy to Use** An adapter flange and clamp-style shaft coupling allows easy assembly with a servo motor.
- **WIDE RANGE OF SIZES AND GEAR RATIOS**
 Sizes: 14, 20, 32, 45, 65
 Ratios: 50:1, 80:1, 100:1, 120:1, 160:1
- **AVAILABLE OUTPUT CONFIGURATIONS** Shaft or Flange
- **COMPATIBLE MOTOR SIZES** 30w ~ 5000w

Rating Table

Size	Gear Ratio	Rated Torque @2000rpm		Repeated Peak Torque		Limited For Average Torque		Emergency Torque		Limit for Average Input Speed rpm	Max Speed rpm	Weight*		Inertia*	
		Nm	lb-in	Nm	lb-in	Nm	lb-in	Nm	lb-in			kg	lb	kgcm ²	lb-in ²
